Monitoring Requirements Not Met for January 1 through March 31, 2020

Our water system violated several drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During _____ we _____ and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for during the last year, how often we are supposed to sample for Dioxin and PCB's and how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which follow-up samples were (or will be) taken.

Contaminant	Required sampling frequency	Number of samples taken	When all samples should have been taken	When samples were or will be taken
Dioxin	Quarterly	1	Between January 1 and March 31, 2020	May 18, 2020
PCB's	Quarterly	1	Between January 1 and March 31, 2020	May 18, 2020

What happened? What was done?

Waiver for Dioxin and PCB's Expired on December 31, 2019 and we failed to test in the first quarter of 2020.
